DISPLAY PICTURE

Your profile picture on your instagram page will need to be a high quality image. It will show up as an image that is 120 x 120 pixels. However, you want your logo or image to be at least 500 x 500 to ensure that it's clean, high quality and readable, especially in a browser..

Keep in mind that your profile image will be displayed as a circle. So keep any important information within the centre space. (highlighted below in a slightly lighter shade).
